

SUDESH SARVANKAR

Senior Product Designer | Product Design Strategy | UX Leadership | Financial Services | Digital Products

Pune, Maharashtra | +91-9689959947 | sudesh2761996@gmail.com | Portfolio: sudesh2761996.wixsite.com/my-site | Behance: behance.net/sudeshsarvankar

PROFESSIONAL SUMMARY

Senior Product Designer with 8+ years of experience designing and delivering digital products across financial services, fintech, B2C, enterprise, and complex workflow environments. Experienced in translating customer needs, business objectives, and technical constraints into scalable product experiences across web and mobile platforms.

Currently leading product and UX design for complex banking workflows at UBS, partnering with Product Managers, Engineers, Business Stakeholders, and domain experts to frame problems, define product requirements, shape customer journeys, and deliver intuitive digital experiences.

Strong combination of strategic product thinking and hands-on design craft, spanning user research, discovery, information architecture, interaction design, prototyping, high-fidelity UI, design systems, accessibility, usability validation, developer handoff, and implementation. Experienced in financial-services customer journeys, conversion optimisation, design systems, cross-functional collaboration, and AI-powered product experiences.

CORE PRODUCT DESIGN & LEADERSHIP SKILLS

Product Design Strategy: Product Design Strategy, UX Strategy, Product Thinking, Design Thinking, User-Centered Design, Digital Product Strategy, Customer-Centric Design, Problem Framing

UX & Interaction Design: UX Design, UI Design, Interaction Design, Information Architecture, User Journeys, Customer Journeys, Task Flows, Navigation Design, Wireframing, Prototyping, High-Fidelity UI, Responsive Design

Research & Validation: User Research, User Interviews, Surveys, Usability Testing, Heuristic Evaluation, Competitive Analysis, Research Synthesis, User Feedback, Data-Informed Design

Design Quality & Systems: Design Systems, Component Libraries, Reusable Components, UI Patterns, Interaction Patterns, Design Guidelines, Accessibility, Inclusive Design, Scalable Design, Design Reviews

Customer & Business Impact: Customer Experience, Conversion Optimisation, Signup Journeys, Adoption, Engagement, Friction Reduction, Behavioural Insights, Analytics-Informed Design

Leadership & Collaboration: Cross-Functional Collaboration, Stakeholder Management, Senior Stakeholder Engagement, Product Management, Engineering Collaboration, Business Partnership, Workshops, Design Sprints, Developer Handoff

AI Product Design: AI UX, AI-Powered Interactions, Human-in-the-Loop, Trust & Transparency, Explainability, User Control, Fallback States, AI Output Evaluation, AI-Assisted Research Synthesis, AI Prototyping

Tools & Technology: Figma, Figma Make, Claude, Cursor, Vercel, Lovable, Sketch, Adobe XD, Balsamiq, Marvel, Adobe Creative Suite, HTML, CSS, JavaScript, React

PROFESSIONAL EXPERIENCE

UBS — GCOO Group Technology

Senior UX Designer | Product Design | Oct 2022 – Present | Pune

- Lead end-to-end product and UX design for complex banking workflows and enterprise digital products, translating business objectives, operational processes, technical constraints, and user needs into intuitive and scalable experiences.
- Partner with Product Managers, Engineers, Business Stakeholders, and domain experts to frame problems, identify customer and user pain points, define requirements, and shape product solutions.
- Drive product design across discovery, research, information architecture, customer journeys, task flows, interaction design, prototyping, high-fidelity UI, usability validation, design specifications, and developer handoff.
- Conduct user interviews, surveys, remote research, usability testing, and feedback sessions to identify user needs, validate concepts, and inform product decisions.
- Define information architecture, navigation structures, user journeys, task flows, and interaction models for complex enterprise applications and banking workflows.
- Create user flows, wireframes, interactive prototypes, mockups, and high-fidelity interfaces in Figma, iterating based on research findings, usability feedback, business requirements, stakeholder input, and technical feasibility.
- Apply analytical and usability-focused approaches to identify friction points and improve task-completion efficiency by approximately 20%.
- Contribute to design systems, component libraries, reusable UI patterns, accessibility standards, and scalable interaction patterns to improve consistency and usability across digital experiences.
- Collaborate closely with engineering teams to assess feasibility, resolve implementation challenges, and ensure accurate translation of product designs into production.
- Design and explore AI-powered product interactions using principles of trust, transparency, explainability, user control, fallback behaviour, and human-in-the-loop interaction.
- Use Claude, Figma Make, Cursor, Vercel, and Lovable to accelerate concept exploration, prototyping, design iteration, documentation, and implementation-oriented workflows.
- Evaluate AI-generated concepts for accuracy, usability, consistency, accessibility, design quality, and product relevance.

BAJAJ MARKETS

Manager – Platform Management & Delivery, User Experience | Sep 2020 – Oct 2022 | Pune

- Led UX and Product Design for customer-facing B2C financial-services platforms, including mobile and web experiences used by tens of thousands of customers monthly.
- Owned end-to-end customer journeys across digital financial-services experiences, translating customer needs and business requirements into intuitive, accessible, and conversion-focused product experiences.

- Conducted user research, user interviews, usability evaluations, and customer-behaviour analysis to identify pain points and improve critical customer journeys.
- Translated business and customer requirements into information architecture, user flows, navigation structures, wireframes, prototypes, and high-fidelity interfaces.
- Partnered with Product Managers, Senior Stakeholders, Engineering Teams, and Business Teams to define requirements, validate technical feasibility, and deliver customer-centric product solutions.
- Used Figma and analytics insights to continuously improve customer journeys, interfaces, and conversion-critical interactions.
- Contributed to a 5–10% improvement in signup/conversion completion through iterative UX improvements and data-informed design decisions.
- Worked closely with engineering teams on design specifications, developer handoff, implementation, and accessibility.

TALKD

UX Analyst | Jan 2020 – Sep 2020

- Led UX strategy across 3 concurrent client engagements, translating business goals, user needs, and product requirements into digital product experiences.
- Conducted user research and usability-focused activities to identify opportunities, understand user needs, and validate design concepts.
- Facilitated design sprints, stakeholder workshops, user discussions, and collaborative ideation sessions.
- Created user flows, wireframes, prototypes, and high-fidelity designs using Figma, Adobe XD, and Sketch.
- Collaborated with clients, users, developers, designers, and business stakeholders to balance user needs, technical feasibility, business requirements, and product objectives.
- Contributed to the successful delivery of 7+ digital products across multiple engagements.

SOFTREAGENT

UI/UX Designer | Jan 2018 – Jan 2020

- Owned the end-to-end product design lifecycle as the sole UX Designer, from research and requirements gathering through design delivery and implementation.
- Conducted user research, stakeholder discussions, and requirements analysis to understand user needs and business objectives.
- Developed information architecture, navigation flows, user journeys, wireframes, prototypes, and high-fidelity responsive interfaces for 2 business-aligned digital products.
- Worked directly with clients, developers, and stakeholders to gather requirements, evaluate technical feasibility, resolve design challenges, and refine solutions based on feedback.
- Produced design documentation and specifications to support effective communication and implementation with development teams.

EDUCATION & CERTIFICATION

Bachelor of Engineering — KJ's Educational Institute, Pune | 2017

UX, UI, Interaction & Problem Solving Certification — Interaction Design Foundation (IxDF)

ADDITIONAL QUALIFICATIONS

- Hands-on experience with AI-powered product interactions, AI-assisted design workflows, AI prototyping, AI-assisted research synthesis, and AI output evaluation.
- Experience with remote user research, user interviews, surveys, usability testing, competitive analysis, and design validation.
- Experience creating sitemaps, navigation flows, user journeys, interaction models, design specifications, and developer handoff documentation.
- Working knowledge of HTML, CSS, JavaScript, and React, supporting effective collaboration with engineering teams and understanding of front-end implementation constraints.
