PROFESSIONAL SUMMARY

Senior Product Designer with 8+ years of experience designing and delivering scalable digital products across financial services, fintech, B2C, and enterprise environments. Strong expertise in product strategy, UX/UI design, complex workflows, and user-centered problem solving, with a proven ability to translate complex requirements into intuitive, business-impacting solutions. Recognized for design leadership, mentoring teams, and collaborating cross-functionally in Agile environments to deliver high-quality, scalable digital experiences. Experienced in driving product outcomes through design systems, data-informed decisions, usability, and AI-powered product experiences.

CORE SKILLS

PRODUCT & UX STRATEGY	UX / UI DESIGN	AI, TOOLS & TECHNOLOGY
• Product Thinking • Problem Framing • Requirements Definition • Roadmapping & Prioritization • Stakeholder Management	• Interaction Design • Information Architecture • User Journeys • User Flows • Wireframing • Prototyping • Responsive Design • Design Systems	• AI UX • AI-Powered Interactions • Human-in-the-Loop • AI Prototyping • Figma • Figma Make • Claude • Cursor • Vercel • Lovable • Sketch • Adobe XD • Zeplin • Marvel
DESIGN LEADERSHIP	RESEARCH & VALIDATION	
• Design Leadership • Team Mentoring • Design Direction • Sprint Collaboration • Cross-functional Leadership • Developer Handoff	• User Research • User Interviews • Surveys • Usability Testing • Heuristic Evaluation • Competitive Analysis • Data-Informed Design	

PROFESSIONAL EXPERIENCE

UBS — GCOO Group Technology — Senior UX Designer | Product Design

- Oct 2022 – Present | Pune
- Lead end-to-end product and UX design for 10+ complex banking workflows and enterprise digital products, translating business objectives, operational processes, technical constraints, and user needs into intuitive, scalable experiences.
 - Lead and mentor a 2-person design team, providing design direction, coaching, feedback, and experience sharing while driving design quality and supporting individual growth.
 - Contribute to product strategy by framing problems, shaping requirements, evaluating design trade-offs, and aligning product experiences with customer needs, business goals, and technical feasibility.
 - Partner with Product Managers, Engineers, Business Stakeholders, and domain experts to identify user pain points, define requirements, shape customer journeys, and deliver practical product solutions.

- Drive UX across research, information architecture, user journeys, task flows, interaction design, prototyping, high-fidelity UI, usability validation, design specifications, and developer handoff, ensuring solutions are usable, scalable, and implementation-ready.
- Improved task-completion efficiency by ~20% by identifying and resolving usability and workflow friction points through user research, usability testing, interaction improvements, and iterative design.
- Improved Internal Employee Center CSAT by 10% by identifying and resolving key usability and findability issues, simplifying navigation and user journeys, and improving access to frequently used information and tasks.
- Contribute to design systems, component libraries, accessibility standards, and reusable interaction patterns, creating scalable experiences across 10+ reusable patterns and enterprise workflows.
- Design AI-powered product interactions using principles of trust, transparency, explainability, user control, fallback behavior, and human-in-the-loop decision-making; use Claude, Figma Make, Cursor, Vercel, and Lovable to accelerate prototyping and implementation-oriented workflows.
- Contribute to data-driven product roadmap planning and prioritization by identifying UX opportunities, translating customer and business needs through user interviews and persona insights into design initiatives, evaluating dependencies and technical feasibility, and providing insights that help senior management make informed product decisions and define near- and long-term product direction.

BAJAJ MARKETS — Manager – Platform Management & Delivery, User Experience | Product Design

Sep 2020 – Oct 2022 | Pune

- Led UX and Product Design for customer-facing B2C financial-services platforms across mobile and web experiences serving tens of thousands of customers monthly.
- Owned end-to-end customer journeys across digital financial-services experiences, translating customer needs and business requirements into intuitive, accessible, and conversion-focused product experiences.
- Mentored junior designers through design reviews, feedback sessions, knowledge sharing, and day-to-day design guidance, strengthening problem-solving, interaction design, and delivery quality.
- Conducted user research, interviews, usability evaluations, and customer-behavior analysis to identify pain points and optimize critical customer journeys, contributing to a 10% reduction in drop-off at key stages of the experience.
- Translated business and customer requirements into information architecture, user flows, navigation structures, wireframes, prototypes, and high-fidelity interfaces, ensuring clear and consistent customer experiences.
- Partnered with Product Managers, Senior Stakeholders, Engineering Teams, and Business Teams to define requirements, validate technical feasibility, resolve design challenges, and deliver customer-centric product solutions.
- Used Figma and product analytics insights to continuously optimize customer journeys, interfaces, and conversion-critical interactions, using data and behavioral insights to inform design decisions.
- Contributed to a 5–10% improvement in signup and conversion completion through user research, analytics, iterative UX improvements, and data-informed design decisions.
- Identified opportunities to consolidate duplicated UI patterns through a reusable component library, reducing design and development planning effort by approximately 20% and improving consistency and delivery efficiency.

TALKD — UX Analyst

Jan 2020 – Sep 2020

- Led UX strategy across 3 concurrent client engagements, translating business goals, user needs, and product requirements into digital product experiences.
- Conducted user research and usability-focused activities to identify opportunities, understand user needs, and validate design concepts.
- Facilitated design sprints, stakeholder workshops, user discussions, and collaborative ideation sessions.
- Created user flows, wireframes, prototypes, and high-fidelity designs using Figma, Adobe XD, and Sketch.
- Collaborated with clients, users, developers, designers, and business stakeholders to balance user needs, technical feasibility, business requirements, and product objectives.

SOFTREAGENT — UI/UX Designer

Jan 2018 – Jan 2020

- Owned the end-to-end product design lifecycle as the sole UX Designer, from research and requirements gathering through design delivery and implementation.
- Conducted user research, stakeholder discussions, and requirements analysis to understand user needs and business objectives.
- Developed information architecture, navigation flows, user journeys, wireframes, prototypes, and high-fidelity responsive interfaces for 2 business-aligned digital products.
- Worked directly with clients, developers, and stakeholders to gather requirements, evaluate technical feasibility, resolve design challenges, and refine solutions based on feedback.

EDUCATION & CERTIFICATION

Bachelor of Engineering — KJ's Educational Institute, Pune | 2017

UX, UI, Interaction & Problem Solving Certification — Interaction Design Foundation (IXDF)
